Ph.D. Candidate in Electrical Engineering      Expected December 2018  
Committee: [Yingli Tian](#) (chair), Ioannis Stamos, Jizhong Xiao, Zhigang Zhu  
Research Focus: Computer Vision & Image Processing & Machine Learning

*09/2009-06/2013*            Nanjing University of Aeronautics and Astronautics (NUAA), China.  
B.E. in Control Science and Engineering      Outstanding Undergraduate Thesis Award

## RESEARCH EXPERIENCE

*2016-Present*            Visual-Linguistic Understanding on Scene Text Images  
Designed new deep neural networks to model the relationship between the scene text instances and context concepts in surrounding environments, which results in better image captioning and visual question answering performance. The proposed framework connects and benefits the Natural Language Processing and Computer Vision research areas.

*2013-Present*            Scene Text Detection and Recognition in Natural Images  
Designed new deep learning based inference algorithms for scene text detection, retrieval, and recognition in the wild, in the presence of image degradations like blur, distortion, noise, cluttered background, etc. Recognized texts in indoor environments usually carry important contextual information which could significantly assist the independent travel of blind or visually impaired persons.

*2014-2016*                Intelligent Navigation Aid for Visually Impaired Persons  
Designed new image deblurring algorithms to remove the degradations in captured indoor videos, then adopted the deblurred videos to perform real-time indoor navigation and automatic destination recognition for the visually impaired people.

*2012-2013*                MICROSOFT KINECT based 3D Object Recognition for Remote Operation  
Designed rendering algorithms to control the Haptic Interaction Point (HIP) to interact with virtual environments created by the depth images captured by KINECT (Microsoft Corp.)

## TEACHING EXPERIENCE

*2017*                        EE I2200 Digital Image Processing  
Teaching Assistant, The City College, City University of New York.

*2017*                        Deep Learning in Computer Vision  
Lecturer, 800+ students, online course on *ChinaHadoop*, the leading AI education platform in China.
